## TO WHOM IT MAY CONCERN,

I deeply appreciate you taking the time to read my cover letter and resume. I am aware your time is very valuable, and I hope I can prove to you that I did not waste it.

I am a hard worker and passionate about digital communication, specifically website design and social media. At this point in time, social media and digital marketing have the possibility to take businesses to the next level. Because I am a college student graduating in the spring of 2016, I have been trained on the latest trends of social media and new developments in the world of digital communication. I am proficient at HTML5, CSS3 and the majority of the Adobe Creative Suite. I particularly enjoy working with Photoshop and Illustrator and integrating personal designs into websites. I will be graduating from the Atlas program at University of Colorado Boulder with a 4.0 GPA and vast knowledge of current platforms within digital marketing.

I hope that in the future I am able to provide you with hard work and dedication to my job, and you can provide me with more opportunities to broaden my intellectual life.

KIND REGARDS,

PAYGE H. KERMAN
